

FOR IMMEDIATE RELEASE: 05/09/2018

**NForce-Fiber® by Canadian Greenfield Technologies Corp. specified  
for Beijing 2022 Winter Olympics**

Calgary, Canada- Today, Canadian Greenfield Technologies Corp. announces the approval of one of its unique products, NForce-Fiber®, for the concrete construction of Xiaohaituo Bobsleigh and Luge Track, near Beijing, China, for the 2022 Winter Olympics. The first shipment of NForce-Fiber® leaves for Beijing this week.

A unique product world-wide, NForce-Fiber® demonstrated its high performance in numerous applications requiring concrete with superior integrity and surface quality. It has been specified for this project by an international team of engineering and construction experts.

**About NForce-Fiber®**

NForce-Fiber® is a unique, high-performance concrete reinforcement fiber, manufactured from the world's strongest and most durable natural fiber - industrial hemp fiber. Tested and verified by independent, world renowned concrete experts, NForce-Fiber® is ASTM/CSA compliant and has been featured in Shotcrete magazine, the leading publication of the shotcrete industry.

**About Canadian Greenfield Technologies Corp.**

Canadian Greenfield Technologies Corp. is a leader in innovative industrial hemp products, led by an international-award winning engineering group, in business for over 30 years.
